

Dear Grison,

November 2012

We are Tomáš and Michal and we are first year at our high school Masaryk's business academy.

We decided to write you, because we think it's a good idea.

We were scared, when we went first day to the new school. We went to the so called Adaptation course. There we played lots of games and had a rich programme. We got to know each other and it helped us to learn how to cooperate. After three days we went back and we started normal education.

We find our high school cool, it has lots of great teachers. Some people see school as evil, but with school everything is better. We realized someone can't go to school. We don't know how it looks like at your school and life, but we admire your courage to overcome obstacles every day of your life. We hope this letter will please you.

We know that you are starting a new stage of your life after finishing school and so we wish you a happy period and success.

Yours sincerely,

Michal, Tomáš and all the other students from our class, 1.B, greet you, and wish good luck for the future. ;)
