

Dear friends

First and foremost receive my greetings. I have just finished my primary education. In school we have been participating in many activities especially in the academics and extracurricular activities.

In the academics activities we have the debating club and I have been a member of the club. On the other hand we have the extracurricular activities such as football and netball. I am more involved in football. These have really made me to develop a high self esteem. I am also a member of a scouting club. This has made me to develop very high self discipline. I am very happy because I am sure that all the skills I have learnt in primary school will help me to achieve my future dream of becoming a successful medical doctor.

In H.H.F.L we have many activities like football, netball, volleyball and rugby. In project I like playing football because it is my talent and my friends likes playing football because that is their talents. I have many friends here but my best friend is Mary Njeri. I love her because we help each other through studies and problems.

H.H.F.L has helped me to know many things about life and helping others and I would like to thank my teachers for teaching me about life.

I would also like to inform you that I sat for my final national examination on fourth of December to sixth December. This exam is the ones which is going to take me to secondary school next year.

How do celebrate your Christmas in your country? I wish you a merry Christmas and a happy prosperous year 2013.

**I WISH YOU A MERRY CHRISTMAS AND A
HAPPY NEW YEAR 2013.**

*For
Evahruba &
Adam;*

**ENJOY
IT.LOTS of
LOVE
FROM
EMMAH**

Hugs,
Emma Mbithe.
