

Dear Emma,

I am very glad that we could thus correspond. I'd like to describe what is happening in the new Czech Republic and of course in our school.

As we approach Easter egg dyeing, preparing and roasting lambs and similar customs, but about Easter, I already wrote about in the last but one letter.

As we approach the quarter, the majority of students in our school is dedicated to tuning marks and seniors are getting nervous, because in less than a month graduation is awaiting them.

In our country we are also getting used to another new change in our country as we elected a new president, Milos Zeman. It's a very clever and quite likeable person. I believe that our country will continue to flourish thanks to him.

Otherwise, we are all looking forward to winter end, it has officially ended, but the weather does not behave and recently even has fallen snow and cold wind was blowing outside.

You have at least some heat there, don't you? And what's new with you? and what is in your policy? We look forward to your next letter. ☺

Sincerely, your friends from the Czech Republic, MOA Jicin
