

Dear friends,

How are you all? I hope you are fine as we are. Here in Kenya the weather is rainy. But I don't like rain because it destroys people's houses. What about your country?

We left the other project which we were staying at Lenana, and now we are in a place called Mutego. We left that place because of the rain. When it rains it floods everywhere. That is the reason why we had to shift. But in Mutego rain does not flood and here it's quiet.

Our new project is like heaven. We have boys and girls hostels, office, art room and computer lab. We also have our kitchen room, toilets, bathrooms and dining hall.

We always do activities like drama, scout, art, music and computer. We love our new project. We closed our school on date 8th April. We closed our school and I came number 18 out of 29 and I had 271 marks.

Your friend
Deril
